That's the kind of proof that backs Doan's Kidney Pills.

Phillip M. Heller, proprietor meat market, 722 Main street, says: "I have used Doan's Kidney Pills a few times in the past and have been greatly benefited by them. At times my back was weak and lame and the kidney secretions passed too frequently, making me get up often at night. I used a box of Doan's Kidney Pills at those times and they have always rid me of the complaint. I think they are a splendid kidney medicine and gladly recommend them."

**"That Telephone is in Trouble..."**

The "inside plant" of the telephone exchange is made up of delicate and intricate apparatus—and no such machinery is entirely "trouble-less."

The signal that operates on the switchboard when you call might "burn out" or stick—then you can't get "Central." The fuse in your line on the "main frame" may blow out—then your telephone is "dead."

Switchboard cords are small flexible cables of many tiny wires; several of the little wires frequently snap from constant handling, then your connection "cuts off."

The apparatus is sensitive to extremes of heat or cold, dust or moisture. It is constantly watched and tested, but no precaution can eliminate all the trouble—these are just a few samples of the things that happen.

Considering all the electrical apparatus and connections involved in a telephone call, it is not surprising that things occasionally go wrong!
